# TECHNOLOGY & SERVICES UPDATE

**MAKE SAFETY #1**

## FULL SERVICE HIGH QUALITY REPAIRS WITH MINIMUM DOWNTIME

Heath's instrument repair centers have been developed to provide quick turnaround, high quality services at affordable prices for all your repair and calibration needs. All of our services are performed by highly trained and qualified Heath instrument repair & calibration specialists.

### **Calibration**

We calibrate your instruments using NIST traceable standards to original factory specifications in order to ensure product reliability and high performance.

### **Preventive Maintenance**

Heath offers a preventive maintenance program for all its instruments to ensure their un-interrupted operation and extended life. We can customize a preventive maintenance program to fit your needs. Please contact your Heath sales representative for further information.

### **Get Quick Turnaround and Minimize Downtime**

With multiple locations strategically positioned across the United States our customers have the flexibility to choose the service center that is closest to them. Lean Processes and multiple repair facilities enables Heath to provide quick turnaround time on repairs and minimize your equipment downtime.

Follow Heath Consultants on our [Facebook](#) and [LinkedIn](#) pages. You will find company updates, employee kudos, safety tips, industry-related news and more.
