OPEN INTERVIEWS | Feb 27-Mar 1, 2017 | 7 am – 8 pm

HEATH CONSULTANTS | THEN, NOW, AND TOMORROW

“We are a woman-owned manufacturer and consulting firm that provides a variety of products and services for the utility protection, asset management, and damage prevention markets.”

**Heath Denver Office - 8200 E Pacific Pl # 407,
Denver, CO 80231**

NOW HIRING

Leak Survey Technicians – \$13-14/Hour DOE

For over 80 years, **Heath Consultants Incorporated** has provided gas leak surveys, underground utility locating, water leak detection, meter reading, and a number of support services. Working with local gas utilities, field technicians determine the location of the underground gas lines and conduct inspections. These lines are usually marked with paint and flags.

Technicians will locate and identify the underground gas leaks. This is completed by reading utility gas maps and using electronic equipment to locate the underground gas leaks in order to identify and report them.
