

Protecting Your Future

With innovative products and engineering services

Norton Corrosion Limited, LLC (NCL) is a certified Women's Business Enterprise providing practical solutions and technical excellence in corrosion engineering, materials, and construction services. Whether your project requires all these areas to be addressed or just one, you will benefit significantly from NCL's extensive experience with all aspects of corrosion work.

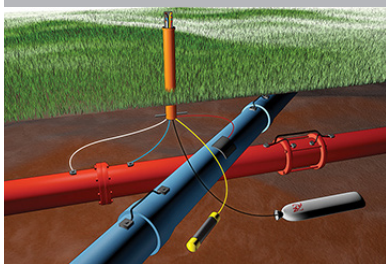

Inspection Services

NCL offers comprehensive inspection services for Cathodic Protection (CP) systems and corrosion mitigation projects performed by our experienced team of NACE International certified corrosion professionals including CP Testing, AC/DC Mitigation, Close Interval Surveys (CIS), ACVG Survey and more.

Engineering

We provide cathodic protection and corrosion engineering services for municipalities, government agencies and facilities/asset owners around the world. Our experienced engineering team offers drawings/ specifications, feasibility studies, corrosion studies, third party oversight, condition assessments and many others. Recent projects include underground piping, storage tanks, marine structures and more.

Materials

NCL is your complete source for impressed current and galvanic CP materials. Recognized as industry leaders in manufacturing, NCL offers the Bayanode® probe anodes, Morganode® marine anodes, and NSF-61 water tank CP systems. Our products are currently operating in some of the harshest environments around the world.

Construction

NCL offers a highly skilled and experienced construction team. Safety and on time installations are paramount to our projects. Our construction personnel receive extensive safety, security and operator qualification (OQ) training. NCL has been issued credentials from CSTOP, ICC, NCCER, DBIDS, and TWIC®. We also participate with such organizations as ISNetworld®, Avetta, and NCMS®.
