

Your Safety...Our Commitment

# TECHNOLOGY & SERVICES UPDATE

September 2019

## YOUR TRUSTED LEAK DETECTION PARTNER Service solutions from wellhead to burner tip

Since 1933 Heath Consultants Incorporated has led the industry in the safety of natural gas utilities infrastructure through the innovative and conscientious actions of our employees. We are the leading provider of leak detection services and products to the midstream, upstream and downstream marketplaces.

Heath is here to support your emissions reduction efforts to comply with the various regulations from Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT) and U.S. Environmental Protection Agency (EPA).

Over our 86 year history we have committed to continually improving our field techniques. Our in-house training department focuses on providing our field technicians the best training in the industry. Heath's highly qualified and experienced management team provides a strong direction focused on quality management, customer service and satisfaction.

Innovation as well as an active research and development team consisting of engineers and marketing experts keep up with the ever-changing technology demands to provide state-of-the-art products to our field technicians and customers allowing for the most reliable surveys possible.
