

Your Safety...Our Commitment

# TECHNOLOGY & SERVICES UPDATE

February 2020

## SERVICES AND SOLUTIONS IN LEAK DETECTION FOR NATURAL GAS FROM WELLHEAD TO BURNER TIP

Heath is here to support your leak/emissions reduction efforts to comply with various regulations from the Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT), Environmental Protection Agency (EPA) and State Regulators.

Heath is committed to continually improving our field techniques through our in-house training department that focuses on providing our field technicians with the best training in the industry. Our highly qualified and experienced management team provides a strong direction focused on quality management, customer service and satisfaction.

Innovation as well as an active research and development team consisting of engineers and marketing experts keep up with the ever-changing technology demands to provide state-of-the-art products to our field technicians and customers allowing for the most reliable surveys possible.

### Walking Survey

We'll utilize a combination of the latest in infrared, laser and/or optical leak survey instruments to safely and efficiently meet your leak survey requirements.

### Mobile Surveys

Depending upon your needs we will employ either our DP-IR+ or OMD to safely and efficiently meet your mobile leak survey requirements.

### Frost Patrols

With winter conditions in full swing, Heath continues with system surveillance in both mobile and portable applications.
