RMLD CS™
Remote Methane Leak Detector Complete Solution

Instructional Video and Mobile Phone Applications Now Available

Heath's RMLD-CS has had a successful introduction into the market with a streamlined design compared to its predecessor the RMLD-IS. This hand-held instrument is lightweight and field rugged with the ability to operate under a variety of field conditions including a wide temperature range, light rain and fog. Remote detection makes it possible to detect leaks without having to travel the entire length of the pipe line, thus creating safer surveys in areas that may be difficult to reach such as busy roadways, yards with dogs, fenced off areas and other hard to access places

Features include:
- Rechargeable and replaceable battery
- Dual battery charger
- Ergonomic housing
- Lightweight
- Graphical user interface
- Color camera
- Color display

Instructional Video

Our new RMLD-CS video is a quick and easy way to learn about the instruments new functionalities and basic operation. Areas and topics covered within the video include button operation, self-test, detection modes, mobile phone applications and more.

GET THE NEWLY RELEASED RMLD-CS APP TODAY

Our newly released RMLD-CS Applications "Apps" provide an easy way for users to connect Heath RMLD-CS devices via Bluetooth (BLE) and capture survey data. The free apps includes the following:

- Search for nearby RMLD-CS devices.
- Connect to a device.
- Select a GPS Logging rate option.
- Start a new survey.
- View the CH4 and Peak CH4 value on the screen.
- Log details of observed leaks including the location.
- Switch between RMLD-CS devices during a survey.
- Pause or end the survey.
- View the trail on a map.
- Download the CSV and KML file, or a zip file containing the CSV and KML of a survey.
- Audible alarms through the mobile application. (DMD, RT, Fault, Warning)
- Low mobile device battery level sound indication.
- Disconnected device sound indication.
