YOUR TRUSTED LEAK DETECTION PARTNER

Service solutions from wellhead to burner tip

Since 1933 Heath Consultants Incorporated has led the industry in the safety of natural gas utilities infrastructure through the innovative and conscientious actions of our employees. We are the leading provider of leak detection services and products to the midstream, upstream and downstream marketplaces.

Heath is here to support your emissions reduction efforts to comply with the various regulations from Pipeline and Hazardous Materials Safety Administration (PHMSA), Department of Transportation (DOT) and U.S. Environmental Protection Agency (EPA).

Since our inception we have committed to continually improving our field techniques with an in-house training department focused on providing our field technicians the best training in the industry. Heath’s highly qualified and experienced management team provides a strong direction focused on quality management, customer service and satisfaction. We have an excellent track record with utilities throughout the United States and abroad.

Innovation and an active research and development team consisting of engineers and marketing experts keep up with the ever-changing technology demands to provide state-of-the-art products to our field technicians and customers allowing the most reliable surveys possible.
